

OUR MISSION

GoodCall are a social enterprise with one mission – to provide charities and social enterprises with the lowest cost and highest quality mobile communications. We have saved thousands of pounds for charitable organisations. We believe that mobile communications barriers should be removed – leaving non-profits to focus on making a positive difference.

Our ethos is simple, we will provide you with a low-cost mobile solution and expert, trusted advice. We also aim to have a direct impact in our local community through offering employment opportunities for individuals who may be furthest from the labour market or who may have additional support needs in the workplace, through utilising intuitive and assistive technology.

OUR SERVICES

GoodCall provide mobile telecommunications services, hardware, account management and directly return value to our non-profit customers in the form of either lower line rental, better handsets or cash. We tailor our services to the needs of every customer and use pioneering data analysis to deliver actionable results for our clients.

We offer proposals and quotes for connection with all major UK mobile networks and our preferred partner is the UK's top performing provider, EE. On average, we have been able to save our customers up to 40% on what they have been currently paying for their mobile contracts. We work on your behalf as your trusted mobile expert.
